

Profile

Tactical-Trading was established in 2005 after realizing the tremendous supply opportunities in the Middle East region for quality tactical-outdoor products & equipment from world renowned manufacturers. Step-by-step the company has gradually grown and is constantly developing professional relationships with reputable retailers, general traders & government organizations throughout the Middle Eastern continent.

Tactical-Trading has a long term vision of continually extending its product range & services to become a one stop tactical-outdoor products, equipment & services supplier.

As stated on other pages of our website we will only deal with reputable companies/agencies and do not offer direct tactical retail sales/services to the general public.

We are constantly looking to set up quality dealers for our distributed products. Don't hesitate to contact us if you think our products and services are of interest.
